

Garden bed 6: The Ledge Garden bed. This is a small Garden bed that begins at the ledge where the E. G. Waterhouse Garden bed ends and is on the right as one descends down the path into the gully. Most camellias in The Ledge Garden bed are best viewed along the path turning to the right as one descends the stairs.

Overlooking the Ledge Garden bed is a **Significant Shire Landmark**, a beautiful curved sandstone seat erected on 2 April 1977 in honour of Addie Viola Smith, legal adviser to the Australian Local Government Women's Association. Ms Smith was the first US woman appointed as Trade Representative to China and as US delegate to the United Nations.
